Richard E. Schmidt

PHASES OF THE MOON 2000 - 2049

This Circular provides the times of the phases of the moon, expressed in Terrestrial Dynamical Time (TDT), for the years 2000 - 2049. The basis for this Circular is the same as that for the Astronomical Almanac, namely the Jet Propulsion Laboratory ephemeris designated DE200/LE200.

The phases New Moon, First Quarter, Full Moon, and Last Quarter are defined to occur when the excess of the apparent celestial longitude of the Moon over that of the Sun is 0°, 90°, 180°, and 270°, respectively. In practice the phases are computed by third-order Besselian inverse interpolation of daily values of the excess of longitude.

The common understanding of the times of New, First Quarter, Full, and Last Quarter as applying to the times of apparent minimum illumination, 50% illumination (waxing), maximum illumination, and 50% illumination (waning), respectively, only loosely corresponds to the precise definition of the phases as given above. In particular, the times at which the Moon reaches these particular illumination levels, as viewed from a specific location on the surface of the Earth, may differ from the times tabulated in this Circular by an hour or more.

The argument TDT can be considered to be the extension of Ephemeris Time (ET), used prior to 1984. The difference between TDT and Universal Time (UT1, also known as Greenwich Mean Time) was (TDT-UT1) = 55.1 seconds for 1986.5. Due to irregularities in the rotation of the Earth, it is impossible to predict values of (TDT-UT1) into the 21st century, but those values are unlikely to fall outside of the range 0 to 2 minutes, and probably will be approximately 1 minute at the year 2000.

The lunations in this Circular are numbered in continuation of the series of E.W. Brown, of which No. 1 commenced on 1923 January 16 (Mon. Not. Roy. Astr. Soc., 93, 603, 1933).

The Modified Julian Dates (MJD) given for each phase are the Julian dates minus 2440000.5.

Phases of the Moon for other dates are available in these Circulars:

No. 112 PHASES OF THE MOON 1800-1959

No. 119 PHASES OF THE MOON 1960-2003

available from the Nautical Almanac Office, United States Naval Observatory, Washington, DC 20390-5100.
